

CASE STUDY

Intelli-Hood[®]
Kitchen Ventilation Controls

Western Culinary Institute
Le Cordon Bleu Program
Portland

ANNUAL SAVINGS:

\$25,000

INSTALLATION TIME:

1 week

PAYBACK:

2 years

The Intelli-Hood[®] controls were installed at the Western Culinary Institute in Portland, Oregon. With 16 hoods controlled by 14 Melink systems, the institute is saving \$130 per hood, per month. Overall, the Intelli-Hood[®] controls are saving the school \$25,000 a year.

"The greatest benefit has been the reduced noise during the non-cooking times. When the fans are not running at full speed it is noticeably quieter in the classroom. This allows for better communication between the Instructor and the student."

Chef Wilke, Executive Chef

"This has been a great system. At first I thought we would have a lot of problems with this technology on the kitchen hoods, but I must say I have been very pleased with the performance. I have had less down time due to broken belts and maintenance issues."

Barry Scott, Facilities Manager
